**FOR IMMEDIATE RELEASE**

**CARRIER TRANSICOLD LAUNCHES COMPREHENSIVE  
PREVENTATIVE MAINTENANCE PROGRAM**

ATHENS, Ga., Sept. 1, 2005 – Further expanding its NextLevel™ service initiative, Carrier Transicold has launched a preventative maintenance program for all brands of truck and trailer refrigeration units.

With standardized services and pricing, the NextLevel preventative maintenance program provides comprehensive inspection and care through Carrier Transicold’s extensive dealer network in the United States and Canada. Covered services include: changing the engine oil and oil filter; belt adjustments; refrigerant level check; thorough test of the heat, cool and defrost cycles; purging of water and contaminants from the fuel tank; fuel filter replacement; inspection of the condenser and accessible evaporator coils; check of the air chute condition and air flow; an overall unit condition inspection and more.

Pricing for the new program is \$114.95 (U.S.) for a truck refrigeration unit and \$124.95 for a trailer unit at participating locations. Additionally, participants in Carrier’s Priority Gold™ credit card program receive a five-percent rebate, plus automatic two-percent rebates on any additional required Carrier Transicold Performance Parts™ or 20-Series™ parts used with competitive equipment. Program pricing remains in effect September 2005 through April 2006.

“We’ve created the preventative maintenance program in response to extensive customer and dealer input,” said National Service Manager Joe Hock. “It continues our NextLevel initiative, which establishes consistent and high service standards for our North American dealer network.”

## **Transicold Launches NextLevel Preventative Maintenance – 2**

“Through this program, Carrier dealers go well beyond ordinary routine maintenance by providing a comprehensive performance check ensuring refrigeration units are roadworthy and ready for the toughest of temperature controlled freight challenges.” Hock continued. “In addition to attractive pricing, customers can expect convenient service locations with the most qualified experts in transport refrigeration, extensive parts inventories, extended straight time service hours at many locations and mobile service nearly everywhere.”

For more details on NextLevel preventative maintenance, turn to the experts in the Carrier Transicold dealer network or access the Carrier Transicold dealer locator at
