CHOICE
overall.

GEN V EM-3. The Ceiling-mount unit that's *top-rated* for performance.

Our Gen V EM-3 rear ceiling mounted air conditioning evaporator has been engineered for maximum serviceability and ease of installation in light and medium duty buses. Because the drain pan is part of the basic system, the EM-3 can be completely installed, charged and tested before the cover is put in place, greatly reducing installation time. Simple cover removal provides ready access to all serviceable components. The Gen V EM-3 provides maximum uniform airflow that establishes the new benchmark for this industry leading evaporator.

SPECIFICATIONS

Standard Features Include:

- New, efficient, Transverse Blower Technology reduces AMP draw and provides increased uniformly distributed airflow.
- Higher capacity unit in a smaller package (height reduced to over 20% less than existing models, thereby significantly increasing head clearance).
- Heavy-duty galvanized steel frame is reinforced for added strength.
- High volume air throw, widely dispersed through bi-directional louvers for total passenger comfort.
- State-of-the-art-enhanced tube & fin coils for maximum cooling capacity.
- Variable speed blower allows for full airflow adjustment to optimize system to individual cooling preferences.

- Reduced service time with single, easily accessible motor, bottom mounted air filter, fewer parts & fasteners.

Specifications:

Cooling Capacity

90,000 BTU/HR - IMACA
47,000 BTU/HR - ARI

Refrigerant

R-134A

Dimensions:

Length 61.64"
Width 20.50"
Height 7.62"

Weight

95 lbs.
