

Carrier Transicold

EQUIPMENT AND SUPPORT

THINLINE Container System.

The next generation in balanced system design for uninterrupted cargo quality. ThinLine™ NT offers superior operating efficiency. Precise, intelligent electronic control. High-capacity performance with ozone-friendly HFC Refrigerant-134a. Field-proven reliability. Exceptional protection across all operating conditions. And the industry's lowest life-cycle cost.

NatureFresh

Exclusive NatureFresh™ humidity-control option maintains natural moisture content and prevents dehydration and shrinkage to maximize cargo value.

EverFresh

Exclusive EverFresh™ controlled-atmosphere option maintains a constant balance of oxygen and carbon dioxide to reduce product respiration and slow natural ripening.

POWERLINE

No other clip-on generator set delivers longer life or more cargo-carrying capacity. Extends product life and maximizes load size. Suits every mounting and fueling requirement.

POWERLINE

Our undermount gen set features the industry's most reliable power train. Specially engineered for container refrigeration. Delivers consistent, reliable power to protect sensitive cargoes.

We have people **WHEREVER** you need *hands-on support.*

No one offers more technical support to meet the specialized needs of container fleets than Carrier. Our team of 29 field-service engineers provides the technical support to answer questions, diagnose problems, and help prepare equipment specifications.

What's more, Carrier conducts 65 training courses in container refrigeration. We can custom-design courses for your technicians. We also offer an expanded selection of in-country native language courses.

Need service? We operate the most extensive container service network in the world. With service centers in every major port, Carrier supports more container reefers than anyone can. Our parts depots on every continent maintain

large in-stock inventories and can process your parts order within 24 hours.

World-class support starts in the classroom and covers every subject you face in the field.

Carrier technicians are factory-certified container refrigeration specialists.
